

## Attic Steps LUX with a Wainscot

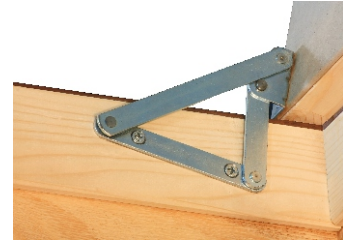

The description of these steps is identical to the classical attic steps OKWELL-LUX. It includes extra:

- the lower cover of the attic steps is dressed with a metal - final coloured with a white colour in order to give the place an aesthetic appearance
- kinematics of the hinge of the lower cover and the dressing of the cover enable that the rift between the cover of the steps and the ceiling is invisible (covered) in a closed position

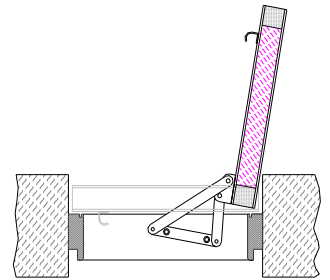

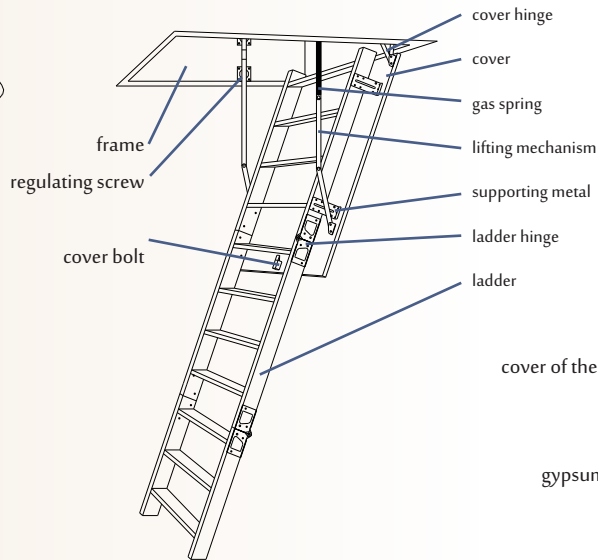

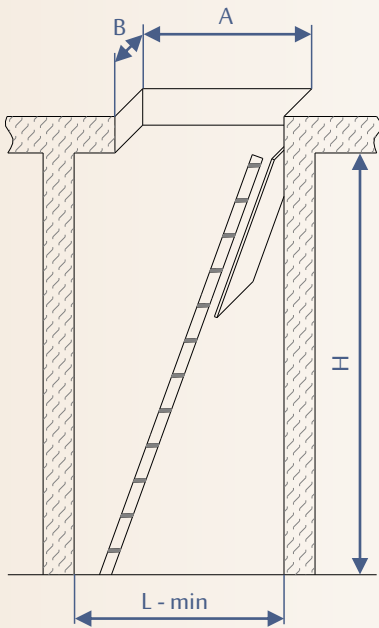

### Anti-dust and Isolation Cover

- the frame of the upper cover is from pine wood thickness 30mm
- the upper isolation and anti-dust cover is made from pine frame filled with isolation thickness 40mm and it is covered on both sides with MDF plate thickness 4mm
- there is a washer between the frame and the upper cover
- a deviated hinge of the upper cover enables that the cover does not hit the opening of the ceiling

### Technical data

#### SPECIAL REALIZATION: 4-PART WOODEN STEPS O-COVER DRESSED IN WHITE METAL

A x B	MARK		H	L - min
90 x 60	4-609	4-609-o	do 270	145
